UCS™ - Ulcer Cleansing System
UCSol™ - Ulcer Cleansing Solution

Non allergenic wound cleansing solution

Medical Device Class IIa
Sterile R

INDICATIONS FOR USE:

- Diabetic ulcers
- Venous/arterial ulcers
- Pressure sores (stage I° –IV°)
- Abrasions, surgical wounds, trauma wounds

CLINICALLY TESTED:

- Cleanses wounds without compromising the skin’s defense system:
  Destroys bacterial biofilm and prevents its new formation. Effective against MRSA. Avoids bleeding during cleansing procedure. It does not have any detrimental impact on host cells. Compatible with modern, interactive wound dressings.

- Accelerates healing process:
  Enhances blood flow, optimizing tissue repair and healing. Maintains optimal wound moisture and hydration of the peri-lesional area.

- Reduces tissue inflammation:
  Helps to establish optimal cellular environment. Facilitates cell repair and growth

- Improves patient compliance:
  Reduces pain during cleansing procedure improving patient’s compliance

7 weeks after amputation*
- Cleansed with UCS™ Ulcer Cleansing System
- Dressed with interactive dressing

6 months after amputation
- Previous wounds required 1.5 year to heal
- The use of UCS™ Ulcer Cleansing System has been the only change in the protocol of care
- After three months, the ulcer has healed completely
*Pori Hospital - Finland
